EOSDIS Test System (ETS) High Rate System (HRS)
HRS Final Project Closeout

Dear Mr. Fuller:

The CNMOS contractor is pleased to turnover the final closeout documentation package for the High Rate System (HRS). This HRS closeout documentation identifies the status of software maintenance activities since the delivery of HRS Release 1.1.0 on 1/30/98. The ETS HRS system as identified in Attachment C is located in GSFC Building 32, Room S9. The ETS HRS equipment is under CNMOS vendor maintenance contract through September 30, 1998.

Even though the Kerberos requirement was waived for the ETS system, we have installed the Kerberos software for the UNIX 9x version on the HRS HP workstation in Building 32. The Kerberos software was delivered as part of HRS Release 1.0. The Kerberos software will not interfere with any normal FTP transfers. We are also delivering a copy of the Kerberos (Kerb*Net) Manuals.

Since the delivery of HRS Release 1.1.0, we have closed 10 Discrepancy Reports (DRs). They are identified in Attachment B.

As part of the closeout we are delivering a copy of the ETS HRS baseline documentation. The documents are identified in Attachment D.

This closeout package contains 7 attachments as listed below, describing delivery media contents, DR status, HRS documentation, and associated hardware and COTS packages acquired as part of HRS.

Attachment A - Delivery Media Contents

The software being supplied as part of the HRS project closeout includes updates to HRS-TPCE. The remaining HRS software source and associated build instructions are unchanged from HRS Release 1.1.0. The TPCE software is being delivered via one 4 mm tape. The contents of the tape is listed in Attachment E.

As part of the HRS closeout, the Hewlett Packard (HP) Unix Operating System for the HP workstation is being provided on its original CD media. The list of CDs comprising the HP Unix Operating System is provided below.

- HP-UX Release 9.0, Application Software, November 1994, 1 of 4
- HP-UX Release 9.0, Application Software, November 1994, 2 of 4
- HP-UX Release 9.0, Application Software, November 1994, 3 of 4
- HP-UX Release 9.0, Application Software, November 1994, 4 of 4
- HP-UX Install Disc, Release 9.05, May 1994
- HP-UX Support Disc, Release 9.05, May 1994
- HP – Turn On The Power Demonstration Disc for the HP Workstation

NOTE: The HP Unix and Workstation Manuals are not being delivered as part of the HRS closeout. The manuals are being used by ETS-MPS personnel as reference documents.

Attachment B – HRS Discrepancy Report Status

Attachment B contains the the status of the HRS DRs. B.1 lists the status of HRS resolved DRs. B.2 list the status of the HRS unresolved DRs.

B.1 Resolved Discrepancy Reports (DR)

B.1 reflects the closed DRs that are delivered with as part of the HRS closeout. Also included is a detailed description of each DR. The DR can be access via the Internet at address <http://iree.gsfc.nasa.gov/ddts/> (directly) or from the ESDIS Integration and Test home page at <http://esdis.gsfc.nasa.gov/integ/integ.html>.

Title: displays clip the names of parameters

***** Problem (Added 970610 by hzavaleta) *****

Many status displays clip the names of parameters on the right, often in the middle of a character.

***** Analysis (Modified 980219 by enoone) *****

Modified all the Status Editor UIL files to provide enough room for the display.

Title: FTP Status window had problem displaying Start and Stop times

***** Problem (Added 970611 by hzavaleta) *****

FTP Status window had problem displaying Start and Stop times for received data set. Fields were shifted up on the page, clipping the upper half of each line. For transmitted data sets, they displayed normally.

***** Analysis (Modified 980219 by enoone) *****

Modified all the Status Editor UIL files to provide enough room for the display.

Title: LZP mode: update was locked, restart whole sys!!!

***** Problem (Added 970611 by hzavaleta) *****

LZP Mode: After running a config set, we shutdown the subsystems involved (FS, RS, SIM, LZP). Activating config set again frequently produces SIM card error: "update was locked, restart whole sys!!!" We did not reboot. Repeating this process sometimes resulted in successful activation. If we did not shutdown any subsystems before reactivating, the error still appeared. However, if we shutdown only the SIM card, the error did not appear.

***** Analysis (Modified 980213 by enoone) *****

This problem seems to have been corrected as a result of other DR fixes. It is not witnessed anymore.

Title: Timeout error requires system Reboot

***** Problem (Added 970611 by hzavaleta) *****

Frequently get this error after attempting to activate a configuration set: "1 timeout on response from VLSI %d!!.
(Error code: 1) Must reboot HRS after each occurrence.

***** Analysis (Modified 980213 by enoone) *****

This problem seems to have been corrected as a result of other DR fixes. It is not witnessed anymore.

Title: R-S Symbols Corrected is not given by VC

***** Problem (Added 970611 by hzavaleta) *****

R-S Symbols Corrected is not given by VC, though a total for all VCs is given. Can't test ability to zero VC counts since this status display does not update in TPCE.

***** Analysis (Modified 980219 by enoone) *****

Modified HRSSVVCStatusEditor.c to make the status editor update from OPMAN.

Title: Service Processor VC Status table can be edited

***** Problem (Added 970611 by hzavaleta) *****

The Service Processor VC Status table is actually editable. It shouldn't be.

***** Analysis (Modified 980219 by enoone) *****

Changed the edit property for the VC Status Editor.

Title: Service Processor Source Status has garbage

***** Problem (Added 970611 by hzavaleta) *****

Service Processor Source Status has garbage in bottom portion of window. (Must scroll down to see it.)

***** Analysis (Modified 980219 by enoone) *****

This is a TPCE-related problem. It is strictly a cosmetic problem that has no impact on functionality. The display data is checked to eliminate garbage display.

Title: Service Processor VC Status Window

***** Problem (Added 980112 by nkaramchetty) *****

The Service Processor VC Status Window does not update.

***** Analysis (Added 980219 by enoone) *****

VC status is now updating.

Title: Packet sequence discontinuity count

***** Problem (Modified 980219 by enoone) *****

The packet sequence discontinuity count is present on the Service Processor Source Status page in the OPMAN local user interface, but not in TPCE.

***** Analysis (Added 980219 by enoone) *****

The packet sequence discontinuity count is now reported on a TPCE display.

B.2 Unresolved Discrepancy Reports (DR)

All the Internal Discrepancy Reports (IDRs) for ETS - HRS have been converted to DRs. The DRs were entered in the ESDIS Discrepancy Report Tracking Tool (DRTT). The DRs are listed by: Number, Subsystem name, Status, Severity, Description, and Related IDR. The DR can be accessed via the Internet at address <http://iree.gsfc.nasa.gov/dtts/> (directly) or from the ESDIS Integration and Test home page at <http://esdis.gsfc.nasa.gov/integ/integ.html>. A full detail of each DR follows appended this table.

TPCE File Transfer Utility invariably reaches state where all actions result in error message: "Unable to send command to hardware". Seems to be a timing problem - in some cases, there is no real error, i.e., the command executed successfully. Workaround is to close utility and reopen. Requirement # V3-5.3.1 thru 5.3.4, 5.5.9

Title: Window jumps after each command

***** Problem (Added 970611 by hzavaleta) *****

File Transfer and Data Set Transfer Utility windows jump to a new position after each command, obscuring the monitor window where the user must see the status of command execution. If the user does not wait for command execution before the next command is sent (SEND, DONE, UPDATE), the 2nd command will not actually execute.

Ideally, these command buttons would be grayed-out (non-operable) pending previous command execution a la the rest of TPCE.

Title: Unable to transfer Data from the ETS-HRS via EBnet

***** Problem (Added 980203 by kgill) *****

We are unable to transfer data from the ETS-HRS system via EBnet. A Memory Test Error occurs whenever we try to perform this function. We can transfer data via manual ftp to our targeted machine but not from the HRS system. HRS data transfer works only when we do transfers to a local HRS account. Also, we cannot recover from a Memory Test Error as a result of this problem. Rebooting is the only way to retry the transfers.

Title: DVT counts

***** Problem (Added 980121 by nkaramchetty) *****

The DVT states that a particular PDS has 37 packets according to its construction record, but it says that it found 0 packets when supposedly searching through the data set. This count is obviously wrong. The data set does have packets. One possible source of this error is that the DVT does not even look in the data set.

Attachment C - Hardware/COTS Software for HRS Workstation, VME Rack and TRS

The HRS hardware and COTS software consists of three CIs: (3.7) HRS Workstation and COTS Software, (3.8) HRS VME Rack Hardware and COTS Software, and (3.9) HRS TRS Hardware and COTS Software. These three CIs are further broken down into their constituent components in the following tables. In addition, spare HRS hardware components are identified. The HRS hardware is located in GSFC Building 32, Room S9. All components of the HRS has been delivered as part of HRS Release 1.0, except where noted.

HRS Workstation and COTS Software (CI 3.7)

Attachment D – HRS Documentation References

The following documentation references are ETS - HRS documents only. Documents referenced by HRS but used or referenced by other ETS systems are not included in this attachment. Attachment K of the initial HRS delivery package (dated 6/13/97) contains the list of all documents referenced by HRS.

The HRS documentation included with this closeout package is submitted in 3 forms:

Electronic -- documents can be obtained via Internet at:

<http://esdis.gsfc.nasa.gov/ets/etsdoc.html>

Soft Copy -- document files are submitted on a Macintosh-formatted ZIP disk. The files must be accessed according to their file extension. The file types are:

- .pdf - can only be viewed with a document viewer program
- .doc – Microsoft Word

Hard Copy - paper copy of documents are included.

The list of ETS HRS documents, are as follows.

1. Electronic Documents residing on the web:
